

MANUFACTURING

Brake Systems Available from Bludot Manufacturing

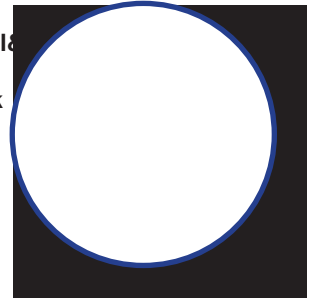

Hydraulic Brake Lines & Kits

Bludot builds custom brake kits for the most common trailer brake systems. Bludot supplies hydraulic brake lines, hoses, and fittings for a variety of applications. All components are made from high-quality materials and are designed to meet or exceed industry standards.

Brake Control Kits

Bludot provides custom brake control kits for a variety of applications. These kits include everything you need to install a brake control system on your trailer, including the control unit, wiring, and hoses. The kits are designed to be easy to install and are compatible with a wide range of brake systems.

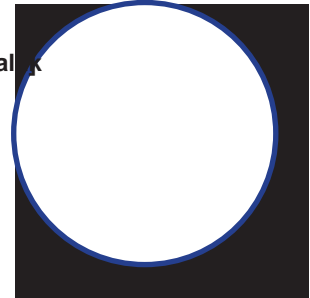

Electric/Hydraulic Actuating Systems

The electric over hydraulic system is a very adaptable and reliable system for a variety of applications. It allows you to control your trailer brakes using an electric signal from your vehicle's brake pedal. This system is ideal for applications where space is limited or where a more compact system is required.

Custom Flexible Hose Crimping for Brake Systems

Bludot provides crimping in various lengths of hose to support production by saving time and steps in-house. We use high-quality crimping equipment to ensure that every hose is crimped to the correct specification. This service is available for a wide range of hose sizes and materials.

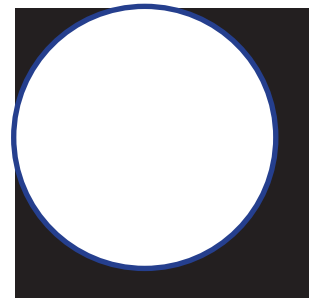

Air/Hydraulic Brakes

The air over hydraulic system is a common application for a variety of applications. It uses compressed air to actuate the hydraulic system, providing a reliable and durable braking solution. Bludot offers a wide range of air over hydraulic brake components, including valves, hoses, and fittings.

Custom Brake Line Bending

Bludot provides custom brake line bending for a variety of applications. Our experienced technicians use state-of-the-art bending equipment to create custom brake lines that fit your specific application perfectly. This service is available for a wide range of line sizes and materials.

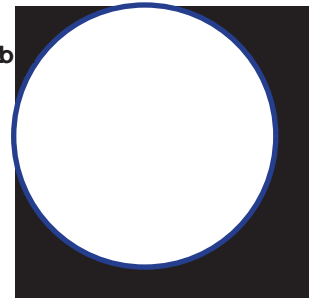

Straight Air Brake Kits

Straight Air brake kits for typically heavy-duty commercial vehicles and trailers are available from Bludot. Components of the air brake system kits for trailers are designed to be easy to install and are compatible with a wide range of air brake systems. All brake system valves and hoses are contained in the straight air kitting package from Bludot.

ABS & non-ABS System Parts

Bludot provides ABS and non-ABS system parts for a variety of applications. These parts include ABS valves, sensors, and hoses. All parts are made from high-quality materials and are designed to meet or exceed industry standards. Bludot also offers custom fabrication services for ABS and non-ABS systems.
